

Use of the Hot Tub

Most guests will have used hot tubs before but these are just a few reminders to help keep you safe and look after the water quality during your stay. The tub is sanitized using bromine which is kinder on the skin than chlorine but do make sure you're not allergic to it! Remember, the cleaner you are when getting into the tub, the cleaner the water will be when you next get into it!

DO:

- **shower before using the hot tub** to remove any oils, creams, perfume etc. as these can clog motors and cause excessive foaming.
- use the footbath provided (fill from the hot tub) to rinse feet before getting in. This helps minimise the risk of grit and mud being carried into the tub.
- open the lid preferably with two people – one either side and do this gently so as not to bend the lid mechanism. Close the lid and lock the clips shut whenever the tub is not in use. They lose temperature rapidly if left open for too long. Please make sure the skirts are pulled down around the edge and not stuck under the lid. Make sure the jets and lights are off after use.
- the mains power switch is on the side of the gazebo in case you need to power off.
- take care entering and leaving the hot tub. Muscles may be relaxed enough to make you unsteady.

DO NOT:

- get into the hot tub wearing fake tan, make up, body cream etc. It will cause significant damage to the tub.
- touch/operate any other buttons than JETS and LIGHTS and on no account try to alter the temperature (up or down) which has been set at 38.5 degrees.
- use glassware in or near the tub. Plastic glasses are provided.
- eat food or smoke in the tub.
- immerse your head under water. This will release residual shampoo/conditioner and cause excessive foaming.
- put any weight on the lids as they are easily broken.
- use the hot tub continuously for more than a maximum of two hours. Running the pumps and leaving the lid open for longer will result in temperature loss and a deterioration of the water quality. We recommend an hour twice a day.
- use the hot tub in strong winds as this may damage the lids

HEALTH WARNINGS

DO NOT use the tub if you are unwell, have high blood pressure, are pregnant, sensitive to bromine or have any open wounds. If you have any doubts, ask your doctor before booking.

And finally:

1. You use the hot tub at your own risk.
2. We cannot be held responsible for your safety whilst you are using the hot tub.
3. You will be held responsible for any damage.

In the event that we have to empty a tub to do a complete water change necessitated by any misuse, we will levy a charge of £50.
